The Honorable _____
U.S. House of Representatives

Dear Rep. _____ :

I'm a chiropractic patient who lives in your Congressional district and I'm writing to you about a bill that is very important to me, H.R.2560

Congressman Don Manzullo recently introduced this bill, which will create – for the first time in the history of Medicare – a separate category for doctors of chiropractic. This change is long overdue. I believe this bill will help Americans stay healthier over the long run and could save us all a great deal of money.

H.R. 2560 is of critical importance to the millions of people like me who benefit from chiropractic services. We don't go to chiropractors for medical treatment. The care we get from our chiropractors is not available from medical doctors. Doctors of chiropractic offer a unique service. That's exactly what this bill makes clear because it establishes a separate and distinct definition for doctors of chiropractic under Medicare. It is critically needed legislation that gives all Americans – especially older people – access to chiropractic.

I think it's important that chiropractic care be available to all our citizens no matter what their economic status. The ultimate goal of the chiropractic profession is to insure a higher quality of life for all Americans and this bill will help reach that goal.

This legislation would benefit all American health care consumers by once and for all describing the separate role for each within the Medicare system.

I ask that you to cosponsor H.R. 2560 as soon as possible.

Please contact Adam Magary in Congressman Manzullo's office at 202-225-5676 to cosponsor this vital piece of legislation.

I would appreciate knowing when you have cosponsored this bill.

Thank you.

Sincerely,
